**The only hair growth formulation that contains 5 powerful ingredients that work together to help grow fuller, thicker and healthier hair.**

Active Ingredients	Mechanism of Action/Purpose
1. Minoxidil 10% (active ingredient in Rogaine)	Widens blood vessels and opens potassium channels, this allows more oxygen, blood, and nutrients to the hair follicles.
2. Finasteride 0.25% (active ingredient in Propecia)	Blocks the action of an enzyme called 5-alpha-reductase (5AR). This enzyme changes testosterone to another hormone called Dihydrotestosterone (DHT) that causes hair loss in males.
3. Azelac acid 2%	Works by inhibiting the enzyme known as (5AR)
4. Ketoconazole 2%	By inhibiting 5AR, the enzyme that converts testosterone to DHT.
5. Tea tree oil 0.25%	Keeps hair healthy and moisturized, which can help it grow at its normal rate and prevent it from falling out.
